ECO T5 UNIT

The Eco T5 unit has been added to the range to provide quality lighting at an affordable price, giving everyone access to good UV lighting. This lightweight single lamp unit, with built in reflector, combines a Reptile Systems HOT5 lamp with a reliable, electronic, flicker free ballast unit all in one convenient bundle. It has a 103° removable reflector to give powerful wide spread of light thanks to its uncoated, highly reflective surface and offers some of the best results achievable for a unit of this type.

Reptile systems lamps have been designed to replicate the profile of sunlight, as closely as possible, to produce a full spectrum lamp with balanced amounts of UVA and UVB, whilst producing excellent natural colours. We recognised the need for good quality UV lighting, for reptiles to convert this to D3, through a series of chemical events. This process is self-regulating and is essential for reptiles to absorb calcium from their diet, eliminating the risk of metabolic bone disease.

The most modern and enlightened way to work out the UV requirements for your reptile is by using the Ferguson zones. These zones are divided up into UV requirements and natural basking characteristics for chosen species. Locate your animal on the chart, or one that closely resembles its behaviour, and this will show you the zone you need.

The Eco T5 unit comes with a free fixing kit, link cable, straight connectors and mains power lead, offering exceptional value for money while delivering excellent results for those who want performance on a budget.

The Eco T5 unit is currently available in the following sizes :

Model	Length	Zone 1	Zone 2	Zone 3
24 W	570mm	●	●	●
39 W	870mm	●	●	●
54 W	1170mm	●	●	●
